

2-WIRE DESIGN & TROUBLESHOOTING

MARCH 19 9 AM - 12 PM

Central's Wyoming Branch

2645 28TH Street - Suite F
Wyoming, MI 49519

TOPICS

Two-wire control has become the standard for most large residential and commercial irrigation systems.

In this class, you'll learn best practices for two-wire irrigation control system design, installation, and post-installation troubleshooting. We'll cover how to avoid common and costly design and installation mistakes, as well as how to identify and resolve the most frequent system failures.

This is a must-attend course for serious irrigation contractors.

COURSE INSTRUCTORS

Jennifer McGranahan, Rain Bird
Garry Duram, Central Pro Supply
