BENEFITS OF LED LANDSCAPE LIGHTS

The primary purpose of LED lights for landscapes is to highlight their features. LED lights can perfectly accentuate the facade of a house or a gently sloping hill by bathing these features in a soft and warm light. Whereas traditional lighting options cast a wide glow of light, LED lighting offers users more control by highlighting specific landscape features with pinpoint accuracy.

Durable

LED lights do not use neon gas or filament, and they're not encapsulated in glass.

Cost-Efficient

Switching to LED lights for landscapes can significantly lower the utility bills of homeowners and businesses.

Safety

LED lights don't shatter like glass. They convert most of their energy into light, remaining cool

Bug-Resistant

LED solutions emit no ultraviolet light, so bugs aren't drawn to them like traditional bulbs.

Env Friendly

LED landscape lights do not contain lead oxide or mercury. They are compatible with standard recycling

MR16 ECOSTAR

BRILLIANCE LED
A HIGHER LIGHT FORM™

GOOD

- » White housing
- » Enhanced ESD (Electro-Static Discharge) protection (IEC-61000-4-2)
